Score: 6.6

2 - Which statement about being visionary best describes your leadership team?

201

We are one of the best in the industry at looking accurately into the future

We have a one or two people who are pretty good at thinking about the future

We think about this once a year or so and I put us at average at best

We really just focus on one year ahead and are pretty tactical

We are normally one or two steps behind everyone else in the industry

3 - Where on the Humalogy scale would you put your organization?

207

4 - How would you rate your organization with exploiting all the value in Web 3.0 Connected Devices?

1 8 9

We are top shelf on this one - better than our competitors

We are experimenting with a few technologies and that is about it

We have good discussions but are slow to execute

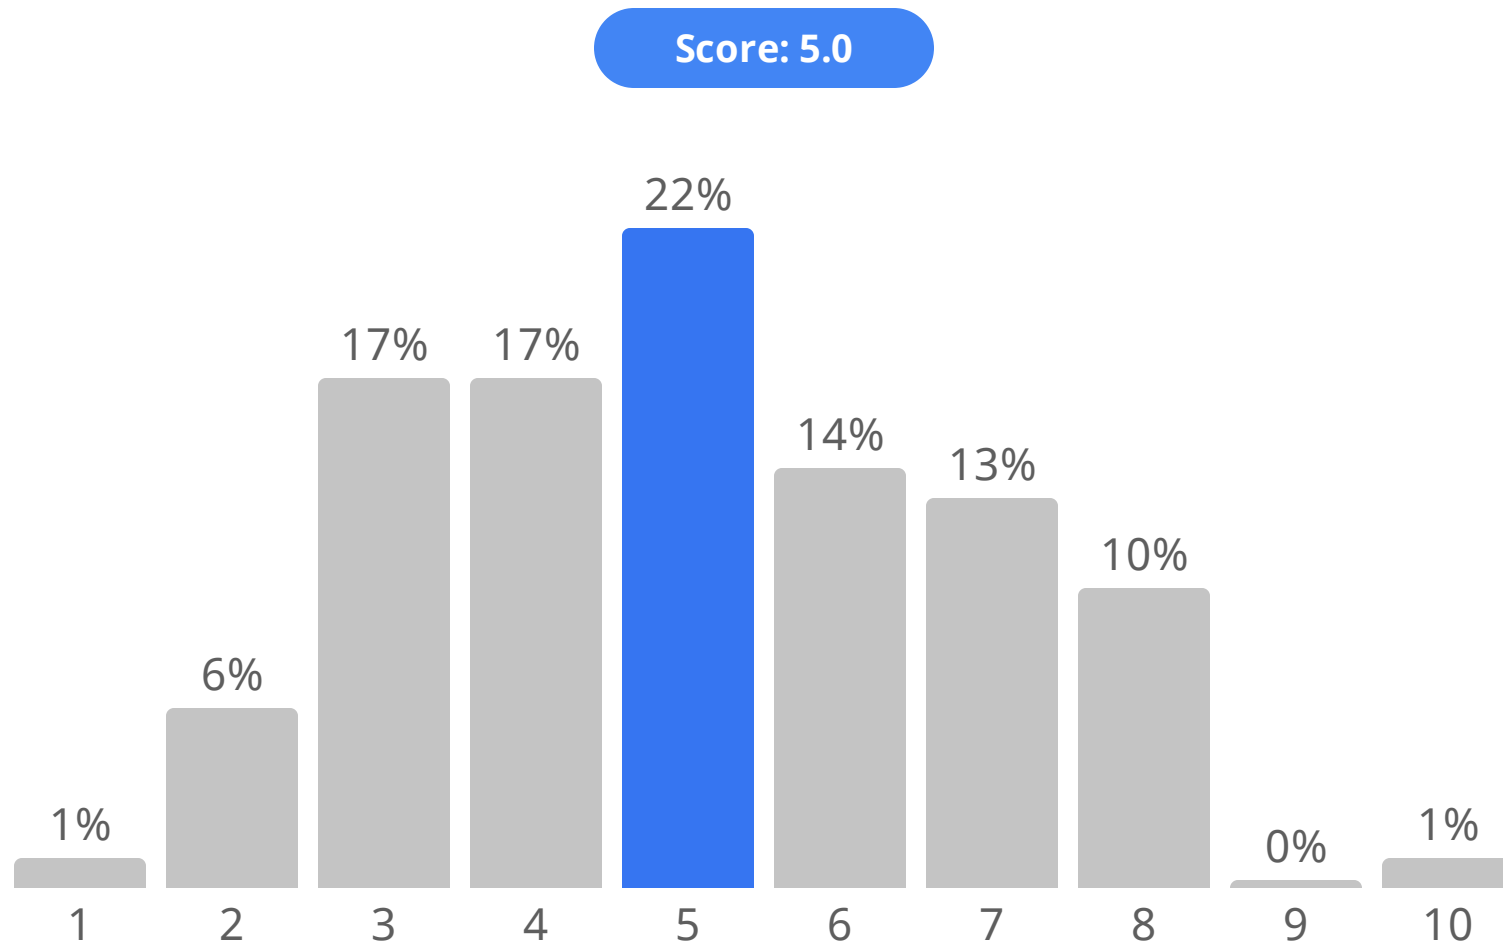

We don't really think about this much at our place

5 - On a scale of one to ten with ten being fast transformation, how would you rate the speed you are automating your organization?

1 7 3

6 - Which statements do you agree with, select all that apply

1 7 5

We are doing well with Mechanical Automation

We use software base workflows to automate some of our paperwork and accounting processes

We are now using RPA to build automating bots

We are starting to use AI's to help help automate work and decisions our people used to make

I love the idea of Cognitive Automation and what it can do for us!!

7 - On the first bullet point, which of the following statements looks most true to you?

1 8 3

Technology is 60% good and 40% bad for humanity
 31 %

Technology is 80% good and 20% bad for humanity
 39 %

Technology is 20% good and 80% bad for humanity
 4 %

Technology is 50% good and 50% bad for humanity
 26 %

8 - Which of the three gaps do you think will have the most negative impact on the world?

1 7 6

The Digital Gap

The Elder Gap

The Parenting Gap

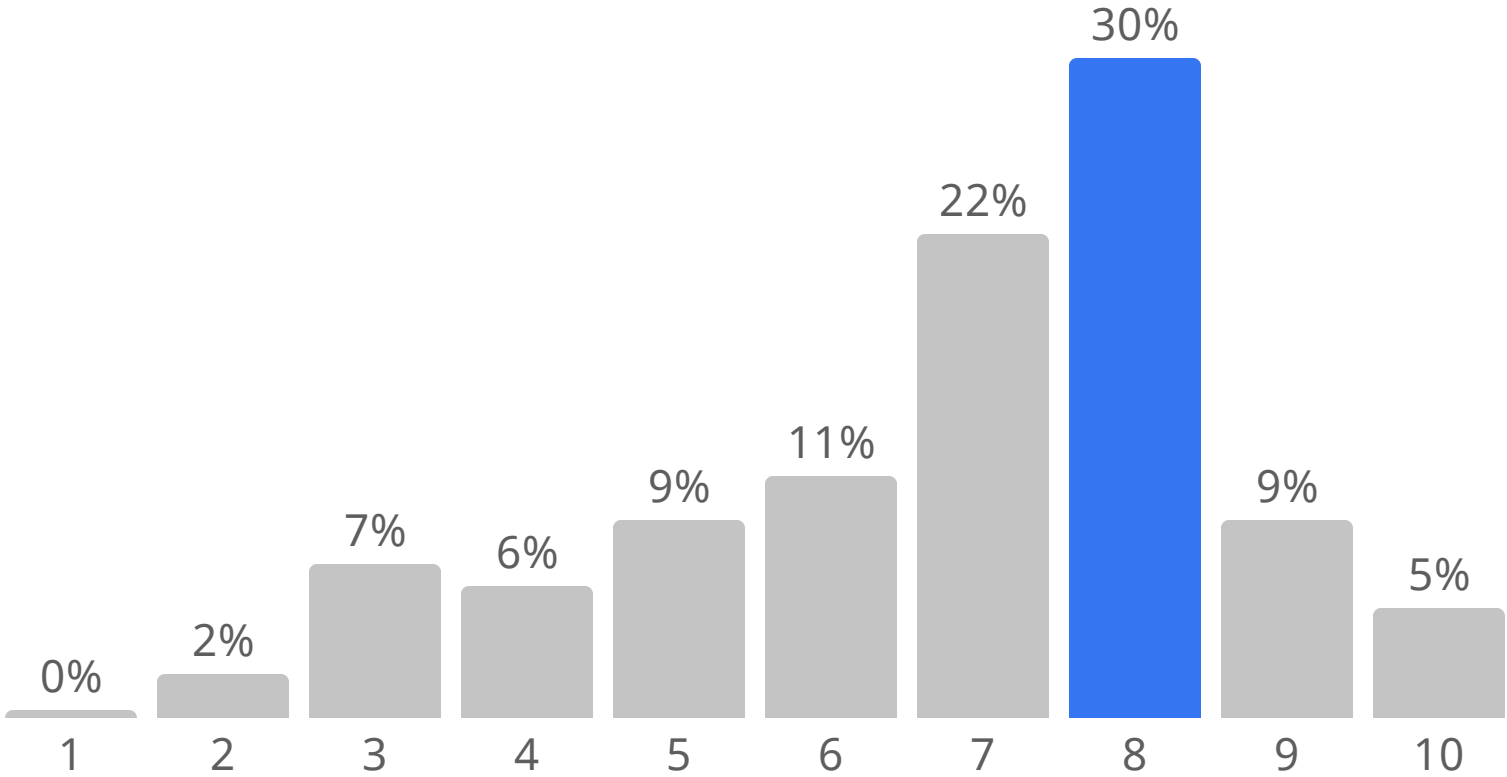

None of the above. I do not see these are problems to be honest

9 - On a scale of one to ten with ten being very impactful, how would you rate the negative impact of technology on your minds stress level?

1 7 3

Score: 6.8

10 - Which statement rings most true to you?

1 5 9

Technology is making most of us happier in life because it brings knowledge and convenience levels we have never had

45 %

Technology is not impacting us one way or the other - there is good and bad and it all depends on how we use it

27 %

Technology overall is bringing us down. The evidence is clear in the levels of depression and suicide in the US today

28 %
